DETAILED ACTION

1. The request filed on September 10, 2001 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/482,277 is acceptable and a CPA has been established. An action on the CPA follows.
2. Claims 47-61 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

Independent claim 47 recites "automatically providing a connection with another one of said remote terminals in accordance with stored telephone numbers" (lines 21-22). However, the disclosure fails to provide support for such connection between a caller at a remote terminal with another remote terminal.

Independent claim 50 recites "testing at least certain of said data entered by said individual caller against a file including negative data" (lines 9-10). However, the disclosure fails to provide support for such testing against a file including negative data.

3. Applicant's arguments with respect to claims 47-61 have been considered but are moot in view of the new grounds of rejection.
